CrossTab (Continued)

CrossTab Overview

Another one of ReportMill's Dataset elements, in addition to tables and graphs, is the CrossTab element. This element is able to show a summaries of a cross sections of data, like the total sales in a given geographical market (Dallas, New York, Boston) for a given product category (Electronics, Clothing, Jewelry):

	Appliances	Clothing	Electronics	Jewelry
Boston	\$ 276,812	\$ 262,070	\$ 267,125	\$ 265,137
Chicago	\$ 258,185	\$ 318,186	\$ 291,664	\$ 249,999
Dallas	\$ 268,482	\$ 242,003	\$ 215,068	\$ 283,427
New York	\$ 219,767	\$ 225,881	\$ 243,386	\$ 314,447
San Francisco	\$ 296,816	\$ 279,077	\$ 268,676	\$ 251,075

Configuring the CrossTab

The CrossTab template is much simpler than the table template. By default it just shows one cell of a simple table. This is usually configured with an aggregate key, like "@total.getAmount@". After that, grouping keys are dragged to the horizontal and vertical axis.
